

## ROLLED ALLOYS QUALITY ASSURANCE POLICY STATEMENT

Rolled Alloys provides our customers with high quality products in compliance with contractual requirements.

We develop, implement, monitor, and continuously improve the systems and processes necessary to ensure that our commitment to quality is achieved. As such, we integrate Human Factors into the planning and execution of all elements and activities associated with our operations, to enhance system performance through the strengths of our people and our processes.

The Rolled Alloys' Quality Assurance System conforms and complies with ISO 9001: 2015, AS9100 Rev D, and additional customer and legal requirements. It also meets the requirements of AS13100.

The Director of Quality Assurance has full authority for the management system, with the leadership promotion, proactive reporting, and commitment of the entire team of Rolled Alloys.
